Can someone confirm if any Seagate externa HD work?

I found this: Extern harddisk Seagate® FreeAgent GoFlex. I was looking for a 500GB disk. Is that the same thing that didn't work in the 250GB version? 🙄

well I can't confirm if my External 250GB HD works with Update 3 right now as I unfortunately don't have my OS4.x machine yet; however, I can tell you that it was working great with Update 1 with no issues other than it being slow with no USB2.0 but it didn't work at all with Update 2.

Hopefully someone else can confirm if it works with Update 3 for you in the mean time.
