WOW!!!

Hmmm,.... WOW!!!!!!!!!!

(NOT "world of warcraft" 😊)

Okay, I will buy one, NO MATTER WHAT!!!!

I can afford the ~\$500 price relatively easily (US and Canadian dollars are almost the same now).

If it's in the 600 to 800 MHz range, I'll be more likely to buy TWO in 2012! (Seriously!)

If it's around \$400 (tax is 12% here) and at least 600 MHz, I may even get a THIRD one to support Amiga!

This IS in addition to one NatAmi.
