That topic are from 2009, not something fresh. 2 years ago i put that ideas on hold because of "new shell almost done". I think we still need to wait aos4.2, to see how new shell looks like (if it will available in os4.2), and will it only as kingcon + tabs, or it will have some different terminal emulations (like vt100, etc) or kind.

And when everything will be clear, then we can think what should be done, and can we wrap the new con or still need it to write new one from scratch.

@spotup

I will try to write a mail to muicon author ([here is homepage](#)). Chances are low that he will opensource it, but worth of trying. Its also include some mui classes which need to opensource as well..

Maybe he will in interest to open it for some money .. but as usuall chances are low.

EDIT: found now that its Jacek Piszczek (jacadcaps) are author, and he are active on morphos pretty much. So, 99% that he will not open source it, and i even not want to stoop again with all that "please give us the sources".

If some of you in interst, write him a mail, maybe by some luck he will give a sources for us.
