Well, no need to contact him, here's the answer from Jacek:

MUICON is a MorphOS program and is not going to be ported to any other OS. Opensourcing is out of question since it relies on MorphOS internals and is in part based on work of other MorphOS Core Members.

PowerTerm.framework(mcc) however is a commercial product which can be licensed to 3rd parties. I am willing to consider a closed source port for 8k euro or handing the sources to a 3rd party (under a closed source license) for 10k euro. These conditions would be exactly the same to consider an AROS or AmigaOS 3.x port. Please send any questions related to PowerTerm to [iconsole@iconsole.pl](mailto:iconsole@iconsole.pl)
