Wow. Seven pages of information, and not one MIDI device in sight.

I can fix that. I have an Edirol UM-880 and a Behringer BCR-2000 that are working great. I can confirm that the "sister products" Edirol UM-550 and Behringer BCF-2000 work as well. I've had great reports on a bunch of M-Audio gear with USB ports, but no details at this time.

If you're also keeping notes on the type of equipment, the two Edirol devices are "Multi-port MIDI interfaces", and the Behringer ones are "MIDI control surfaces"
