Hi All

I had been away from the Amiga scene for some 5 years and returned after finding computing (using my Apple MacBook Pro) although complete and useful very boring!

It has been quite an eventful return, buying a SAM460 and installing all my backed up software and getting back to the community, am really enjoying being an 'Amigan' again.

I have re-joined the ANT Amiga user group and go whenever work allows and enjoy it very much. I would like to say a BIG THANK YOU to all the people on here that have helped me, some simple silly things and some bigger problems all resolved with your help, it makes me proud to be back with the Amiga and associated community again, feels good

I have contributed to many projects financially now and looking forward to all the updates and progress that takes place, the likes of Lo-View, Cinnamon Writer, MUI OWB and Timberwolf just a few examples of excellent software available on the Amiga.

Long live the Amiga

PS: Am selling my Apple MacBook Pro now!
