hoping to upgrade from Amiga OS4.0 to OS4.2 when it's available.

I'd argue for buying OS4.1 right now (it is a *massive* improvement over OS4.0), rather than waiting around for an OS update that has no announced schedule. (Yes, in principle Hyperion could announce tomorrow that OS4.2 is released, but IMHO experience should have taught Amiga users to buy what is available right now, rather than delaying for what is promised at some unspecified point in the future. In the "worst" case, that Hyperion DID announce OS4.2 tomorrow, well no one says you HAVE to buy OS4.2 as soon as it is available. Well, unless you have bought into our "buy on credit now, whether or not you can afford it, pay later with interest & regret" culture).
