Welcome back mate !

I believe we met, way back in '03 at Eyetech's stand at some show or other in the NEC.
Tell Rhino 4.1 u4 works fine in the XE (at least on a G3 it does)

I used to subscribe to that mag - I don't suppose there's any chance of a return !

Thanks, yes I was doing a lot of shows back then showing of Amiga OS4, met lots of nice people. Rhino has decided to get OS4.1 and try it on his machine, he has played with it on my machine and was impressed with developments. I believe hiis machine is a G4?

We really enjoyed making the magazine although hard work to get it out more or less on time! I'm afraid there is no chance on Total Amiga coming back as Rhino is very busy with his Open University work and I just don't have the tallent! I wrote some articles but that's about it for me I'm afraid.

BTW love your avatar 😊
