- Drag & Drop support (customizing, bookmark sorting)

This was unexpected, but very handy. (It doesn't seem to work quite right in some cases, so some bug reports will no-doubt be forthcoming!)

Quote:

- Clipboard support (text only at the moment)

Thanks! This finally means I can use Timberwolf to reply on forums (like this post!).

Quote:

- Sound support (can now play video and audio streams)

Seems to work (but of course not that useful on YouTube until graphics updates are optimised).
