@Tfrieden

Thanks for this new version.

By the way, is this normal that after having used it for a while, the CPU gets stucked at 100% usage and that many BackGournd CLIs are open (size : 1x1).

I have discovered this when I wanted to take a grab of TimberWolf with Sgrab. The more I surf and the more some Background CLIs are opened.

If I close TimberWolf, they all dissapear.
