I think your just using the wrong player... PlayCD or was it CDPlay check aminet.

I was referring to SYS:Utilities/PlayCD of course 🤔. AFAIK there is no CDPlay included with any version of AmigaOS 4.x...

Anyway I'm only using PlayCD as a test case because from what I've heard the latest PlayCD beta has a "USEAHI" option to play CDDA over AHI and therefore doesn't need any patching to work with newer drives.
