With CDDAPatch and latest cdplayer.library/diskimage.device CDDA playback seems to be working in TSotTM 😊. Biggest problem with this game ATM seems to be that the playback doesn't stop when you quit it. I'll have to look into why this is...

I've fixed the problem with the playback not stopping. The first "official" release version of CDDAPatch can now be downloaded from here:

http://www.a500.org/downloads/audio/cddapatch_7z.readme

I've also uploaded this new version to OS4Depot and Aminet.
