On AmigaOne XE and a FFS2 partition, TimberWolf RC2 has been working great from the beginning and I'm using it every day WITHOUT any of the RC1 files.

Yes, and it also works pretty well on my X1000/SFS. I just have to reassign T: to a disk path before running it. It's much better than RC1 here, at least.

But RC3 will definitely be welcomed when it's done 😊.

Best regards,
