I have spare (3.3v+5v PCI) KONIG USB card with VIA VT 6212L chip.... anyone know what might happen if I put it in my SAM440ep-mini ....

- A) it works
- B) smoke
- C) I do not dare to....

hmmm

Then I should also test Opticam USB webcam ... BUT NOT TESTED YET!

I tried inLine ide to sata konverter some time ago, did not work, need to retry.

And fujitec HDD->USB adapter that I have not tesed yet...

Those USB based Anysee DigitalTV receivers should be in "write your own darn drivers" gategory... same for the FujiTec one. Anyone trying to port linux drivers for those?
