URL:

NetSurf development builds are now available for AmigaOS 4.0+ (and other platforms):

<http://ci.netsurf-browser.org/builds/>

Please heed the warning. It is recommended to use the latest stable release, and save everything first if you want to test a development build!

Since CI ~4250, OS4 builds need newlib.library 53.5 (I think) which might limit it to OS4.1.

12/12/17 - There are now AmigaOS 3.5+ builds at <http://ci.netsurf-browser.org/builds/amigaos3/>
