If you add **LOGFILE RAM:NSINSTALL.LOG** to the end of the "Installer" line in AutoInstall, then in the Shell:  
cd to wherever AutoInstall is  
execute AutoInstall

It will run through as it does normally, but create an Installer logfile as RAM:NSINSTALL.LOG. Paste that in here, or send it to me, and I'll hopefully be able to fix it.

You'll probably need to roll back to v2.8 first though!
