I am nor able to save the result of my choice. I can test it: OK i can use it : OK

When i try to save i get this error message cannot open 'FKey' file.

Snoopy does not tell me where it looks for this file. i did read something like 'directroy not tracked'

Maybe it was created on your system with an older version of Fkey??

Can you verify where it is on your system and post what it contains?
