URL:

Ok, Icon didnt appear to WB, because of tootype ACTIVATE=0 , now it is ACTIVATE=1 and works.

Retested with ACTIVATE=1

Logon tootype as it was: STARTUP=URL http://username:psswd@webdav.mydrive.ch NAME CLOUD

That causes CLOUD:test/test> prompt in shell, where it could be CLOUD:test>

Changed STARTUP=URL http://username:psswd@webdav.mydrive.ch/ NAME CLOUD

Wich didnt made any difference, still CLOUD:test/test>

Some difference here is. With webdav.mydrive.ch/ -mount I got dir. All old drawers shows up. Then I made new drawer kokkeli. Only kokkeli shows up next dir command.

Then dismount, tootype to webdav.mydrive.ch and remount. All drawers show up, including kokkeli.

I deleted all contents in CLOUD: , dismount, remount with webdav.mydrive.ch.

Same again, CLOUD:test/test> prompt in shell, same ghost drawer under test.

I deleted all contents in CLOUD: , dismount, remount with webdav.mydrive.ch/.

I deleted all contents in CLOUD: , dismount, remount with webdav.mydrive.ch/.

Same again, CLOUD:test/test> prompt in shell, same ghost drawer under test.

So, cant get any difference between webdav.mydrive.ch/ or webdav.mydrive.ch

CLOUD:test/test> prompt stays, same ghost drawer allso.

Same behaviour, if I enter directly CLOUD:test and execute del #?, it epties whole cloud.
