Hi there,

can anyone tell me what kind of CPU socket XENA features?

It would be sufficient to know if it is compatible with, or even one of, the following...

Intel-Socket 775, 1150, 1155, 1156, 1366, 2011

AMD-Socket AM2, AM2+, AM3, AM3+, FM1, FM2

I'd like to replace the (pretty loud 60mm) original heatsink/fan with a more stylish and quieter one.

Thanks a lot
