I am not a great fan of Masons style but it sure looks way better than the old icons!

At least Mason always have motivation and energy to help with all request in terms of icons and all other graphics work. If anyone else will draw some more nice toolbar images and icons, we of course can just include them to build as well.

Do you have plans to improve the ftp support in the future? SFTP etc I mean. Not many sites use the plain FTP protocol these days.

Added to TODO, but i am personally in interest in just that: stable native version + support of all that icons. So it can be just usable and looks good, and then, anything else. Check [that thread](#) for TODO (first post).
