I haven't heard any problems with PCI card, could this be usefull?

<http://amigaworld.net/modules/news/article.php?storyid=5816>

I made a search sam ep pci on amigaworld, it was only match.

I'm running that utility on my startup, I also tested d-link without it running in background.

On my sam, I don't have any problems with addnetinterface, it work nicely.
