URL:

@pvanni

it works by ContextualMenus or by deficons

If selected by RMB or clicked, the picture is opened in screen scaled mode.

After you can switch to

-real size mode (with space bar or RMB menu)

-specific size by RMB (a window is opened to specify the desired size)

it works, if you want, i will send you it when finished in 1 or 2 days (if you send me you mail adress by PM or mail)
