JamVM bug

Author: : jap

Date: : 2013/11/5 12:31:11

URL:

Hello,

I tried running EpubCheck (<https://github.com/IDPF/epubcheck>) with JAmiga.

It seems that if the jar file (epubcheck-3.0.1.jar) is on a hard drive, jamvm refuses to execute it:

```
java.lang.ClassNotFoundException: com/adobe/epubcheck/tool/Checker
at java.lang.VMClass.forName(Native Method)
at java.lang.Class.forName(Class.java:233)
at javavm.java.lang.JarLauncher.main(JarLauncher.java:46)
```

If the jar file (epubcheck-3.0.1.jar) is on the RAM disk, jamvm starts executing it but after a while it crashes.
Here is the crashlog:
