@Antique

we recomend the Xeox Pro from Speedlink for our games.

Data:

Xeox Pro Analog Gamepad USB, Speedlink, SL6556-BK.

<http://www.speedlink.com/?p=2&cat=4132&pid=28040&paus=1>

there are two versions. one with cable, one wireless. The wireless versions has some problems here on my sam460, sometimes the connection is interrupted while plazing. We have no problems with it on the X1000, works well there also with two of them in 2 plazer mode. On back of the joypad zou have also to set the button to "D".

We also tried other gamepads, works also well. One Microsoft gamepad, one cheap noname.

Very importing is to calibrate the device before playing in "AmigaInput".

Some customers also play with the USB version of the "competition pro" joystick.
