True, K-L,
Kind public feedbacks are very important for the motivation.

It costs nothing for the user but the amateur "dev" feels really better after have waste all this time to make a program and overall to have replied to around all requests from others Amigans, certainly users.

Nevertheless, soon, new representation for all my dockies.

- information Reaction window for all
- info window can be positionned
- in the 4 borders of the screen
- at the center of the screen
- below the Workbench title bare (snapshot below)
- above the AmiDock bottom bar
- right or left of the docky
- minor changes, new tooltypes...

Available soon, just have to complete the f\$7/'ing ReadMes.

Bye,
Guillaume
