Problem installing JAmiga 1.2?

Author: : jaokim

Date: : 2014/1/5 16:01:57

URL:

It has been reported by JosDuchIt that installing JAmiga 1.2 to a drive (or drawer) with a space in the name, failed when unpacking vital classes.

This has now been fixed.

You can download the updated archive from [os4depot](#).

This bug exists in JAmiga 1.2 archive downloaded from os4depot on or before the 5:th of january 2014, having Install script version 1.2.

Sorry for the inconvenience.

Please report any irregularities (or why not, success stories) here on [amigans.net](#).

*Edited: Entire archive is now uploaded and approved on os4depot.*
