Now, in 1.23, when I ignore SSL errors in OWB Security settings
Error 51 : SSL peer certificate or SSH remote key was not OK

I just rechecked the 1.16 version and it works well when I "Ignore SSL errors"

Is somebody with the same error ?

Yes I too am getting this error, I thought v1.23 would have fixed it. The Error 35 SSL message from v 1.16 now works OK but this Error 51 remains.

I get it with <http://www.mbnanetaccess.co.uk/>
