Ok, I'll check that about tabs. Also since the newer version my Amiga froze completely twice randomly (never had any problems before) and I'm forced to reset from the button.

@ tommysammy

I had the same problem with that, with greek characters, they have to be converted in UTF8 mode, and if not, I see empty spaces like yours, so I left the context menus in english. Probably that missing entries have been changed with german umlauts?
