try this one:

<https://dl.dropboxusercontent.com/u/69645023/uaerc>

Change the "filesystem2" lines to your needs or just remove the lines, or comment it out with the "#" symbol.

Or you can type:

```
makedir work:UAE-HD
```

```
makedir work:UAE-HD/Workbench
```

```
makedir work:UAE-HD/Work
```

```
Copy OS3.1 workbench to work:UAE-HD/Workbench.
```

```
Copy what ever you like into to work:UAE-HD/work
```

all the JIT compiler options should be already configured for you.
