No difference (I get the same results as with 5.1) using novsync option. P96_PIP still stays in sync (60 FPS).

For comp I get the same results too.

Anyway, it's not that important since it works (it's just we cannot benchmark correctly). P96_PIP from Joerg still allows benchmarking by the way. I hope he releases it soon 😊

Edited : testing with -vo comp I've found that if I add -vsync in Mplayer option, I do not get anymore tearing with compositing (and benchmarking gives the exact same behaviour as with P96_PIP) 😊
