Right, I don't know why but it fails when trying to open (for me too)

```
QMessageBox::warning(this, tr("Error"), error);
```

Ok, when you look at don't forget that we had this problem atleast since the latest 2 releases, so it's not a new one ..

Quote:

In the debug version above, I replaced it by a simple print to the console.
Could you test it, please ?

Yes thanks mate, but the links above are broken 😞
