Almost all software has some issues or some thing that can be better.
Do you know of any issues, please report bugs to the bug tracker.

<https://code.google.com/p/mplayer-amigaos/issues/list>

Many bugs and problems has been reported has been fixed:

<https://code.google.com/p/mplayer-amigaos/source/list>

Problems that has not been reported has not been fixed, because I can't fix problems I don't know about.

DvPlayer is nice player, DvPlayer its optimized for DVD playback, but you can use mplayer to play DVD's as well, My impression is that DvPlayer does not support as many video formats as MPlayer.

I'm shore Stephen Fellner will be happy if people support him and buy DvPlayer.
