A big help!

I could guess a lot of them, and should have guessed "copy (all)" and "move (all)," but the great idea of "Copy as" was totally new to me and the six after "Delete" had me stumped entirely. (I'm too dumb to remember C:Copy X to Y! )

I suppose I should have trusted DOpus not to do anything bad without warning me and gone ahead and tested those, but I was chicken.

I did some of the things you suggest as I went through your blog, but not all. The result is that Workbench wants me to assign DOpus (easy enough) and some of the programs I call from DOpus still open on Workbench. But I can imagine going whole hog in the near future.
