URL:

I created a short course on ProAction programming with python.

ProAction is of course my GUI server for AmigaOS 4 using the Reaction Toolkit.

This short course in the form of annotaed source code is spread over 6 pages and attempts to explain the process of building up a small app with a ProAction GUI.

It starts here:

[http://www.broad.ology.org.uk/amiga/p ... 0_Starting_ProAction.html](http://www.broad.ology.org.uk/amiga/p...0_Starting_ProAction.html)

Please ask any questions you may have, either here or by email, but if in the forums others may see the answers.
