URL:

Been promising to do this for a while.

http://youtu.be/gjifrE_x4kw

It demonstrates how to sync two videos and a sound track using scrubbing. How to cross fade between two videos, and how to add basic titles.

Also how set up for rendering a video.

More information about the AmigaOS4 port of blender can be found at www.broad.ology.org.uk/amiga/blender/

Blender is run on an AmigaOne X1000 using Wazp3d

The subject matter of the demo video is of course a short sequence of blues guitar played by yours truly.

At the end of the demo video the completed video is played back on AmigaOS at 720p using mplayer and the ReadeonHD 2.4 drivers from A-EON..
