@Severin

Your benchmark results, shows the X1000 in action, it does not say anything about the speed of mplayer on sam460.

PA6T chip runs a 1.8Ghz, the AMCC460ex Soc runs at 1.1Ghz. (Diff 700Mhz)

PA6T has AltiVec, the AMCC460ex Soc has no AltiVec.

In other words the PA6T is many times faster then AMCC460ex SoC.

I don't know if "-lavdopts skiploopfilter=none" is ignored when in the command line argument or not, when you have it in the config file.
