What are the advantages of SMTube over Odyssey? I guess I'll look into it, but the only problem I notice with Youtube on Odyssey is jerkiness with some videos. It would be good to cure that. But I have Ubuntu as a way around that problem.

I have occasionally got a message that I need to upgrade to the latest Flash; I can't remember if that happens with Youtube or not. Maybe SMTube cures that too. I'll look into it first thing tomorrow. Thanks.
