@Xenic

Uploaded dopus4, as dopus4.lha, with pointing to replace old Directoryopus.lha, as well as add all the stuff you say to the readme.

@all

I upload it not as "uploader", but as myself, but that sucky enough. Ppls will think that i somehow related to it, while i am not. But whatever.. file will be here and of latest version and that is good.

@Orgin

Probably old version password protected, if so, can you manually replace old directoryopus.lha on new one i upload few mins ago ? Thanks in advance.
