URL:

Decided that it was time that i write my first academic paper using my Amiga-One. This should be possible with the usage of the excellent X11 solution with AbiWord :)

Abiword have all those features that i require, except spellcheck in english. It seems you have to compile those yourself...and hence this request:

Did anyone compile this dictionaries yet? included is only german (from abiword on os4depot)

Cheers,
Haymigga

All languagues (almost) can be found here

<ftp://ftp.gnu.org/gnu/aspell/dict>
