Report+ gets OS4Depot readme support

Author: : orgin

Date: : 2015/6/30 19:22:05

URL:

James Jacobs has added OS4Depot readme file support to the [ReportPlus](#) application.

This will help you create your readme files for FTP upload to OS4Depot.

Just remember to name the readme file properly before uploading. The OS4Depot readmes are not named the same way as aminet readmes are.

Instructions on how to name the readme files can be found [here](#)

A big thank you to James for adding this to Report+ !
