@BSzili

wow, thanks!

On my X1000 emulation quality is poor, sound is low quality and speed is little slow.
Version 2.1 worked earlier much better but now it is keep crashing.

I remember that somewhere between OS4.0 to 4.1 I got getting these quality problems, earlier when I had Micro
A1 I had same problems.

So I think it allso something to do with OS itself, something has changed during upgrades, that's my quess.

Anyone else, try Vice versions 2.1 and 2.4 do you see emulation difference?
