I think I will upload some dicts for AbiWord on OS4depot.

@all

At the moment I have compiled these dictionaries, which I want to upload to OS4depot:

- czech
- danish
- english (british, american, canadian)
- finnish
- french
- hungarian
- italian
- polish
- portugese

If you need an other dict, please give me a note!

@mufa

Do you need the "Alt" or "Alt Gr" key for this characters? If yes, this is a problem of the X server, which must be fixed.
