@nubechecorre

I can confirm that settings you gave us works for me, the sound speed is normal etc.

For some reason I get total freezes randomly, it's maybe only my ques but it seems often happening right after I have powered up my X1000.

The freeze effect happens right after I click right mouse but as I said it seems to happen randomly.

But when Vice is up and running it seems to be stable

Thank you, I will continue testing...
