As far as low memory handlers go, I'm a total end-user, no idea if it's an "I've bought a nice new 'thingy' for my room but I need to remove some of this old stuff to make space for it" in dopus or if it's mum (OS4) sneaking up behind Dopus and clipping it round the ear, bellowing about not enough space for the 'thingy', get rid of the old stuff" ...

Now I know better...
