The OS4 wiki wasn't updated with the PC keyboard scan codes, but the AROS one can be used as a reference:

http://wiki.amigaos.net/wiki/Keymap_Library

<https://en.wikibooks.org/wiki/Aros/Developer/Docs/Libraries/Keymap>

Thanks to some recent wikimedia changes, it looks a bit messy. If you copy it into a text file you can remove the unnecessary line breaks, making it readable again.
